Tribute Wall

BO

“ Remembering, first of all I'm shocked that no one has commented on your guess book & tribute page. What a shame. I knew you on & off for around three years, in a less than favorable setting. Given the opportunity I believe many people saw a future for you even though you possibly didn't see it for yourself. It was obvious to me and for those who knew you at all that your environmental influences played an important role in your decision making choices. We'll never know how your life may have ended up. You barely reached adult hood and how sad that is. I will choose to remember you as a person with high energy, caring spirit and high potential. I'm so sorry for the life you had and the tragic finally. All children deserve better that. God be with you and rest in peace. Bob
